

RJ WEEK 2015 IN CROATIA

A group of graduate social pedagogy students from Faculty of Education and Rehabilitation Sciences (Department for Behavioral Disorders and Department for Criminology) from Zagreb will try to promote Out-of-court settlement throughout their project "*Out-of-court settlement. What do we know and what we should know*" during November. In a short movie they made, the public will be able to see perspectives from different people on their understanding of restorative justice and Out-of-Court Settlement. Also, the students will try to promote the concept of restorative justice and Out-of-court settlement through informing broader public about its main elements and most importantly, about the benefits of their implementation in Croatian juvenile court system.

The main aim of this project is to show people that restorative justice, as well as Out-of-court settlement, are a good way in reducing the negative aftermaths of crime, as well as a path in making a better, more forgiving and compassionate society for the victims, offenders and the whole community.
